

Goal: Improve Exascale Computing Project (ECP) developer productivity and software sustainability while ensuring continued scientific success.

1 Interviews with Exascale Computing teams

- Applications & Software Technology
- Understand crosscutting productivity challenges and opportunities

3 Customize and curate methodologies

- Targeting application productivity and sustainability
- Create user stories to convey requirements from interviews; create PSIPs to determine priorities and plans for work

2 Productivity and Sustainability Improvement Plans (PSIPs)

- Work with team to define focus and track progress on particular area(s)

4 Outreach and training

- In partnership with US Department of Energy computing facilities
- Documents: WhatIs and HowTo docs
- Webinar series and tutorials
- Better Scientific Software site (<https://bssw.io>)
